Profile

Full stack developer with experience in React, React Native, Node.js, SQL, MongoDB, GraphQL, Docker and more. My background in education means that I strive to write code that is semantic, well-organized, and tells a story, all while utilizing honed presentation skills and changing hats every minute.

Professional Experience

Front End Design Lead

Swift Video Meetings

present

I work in a team of three developers to implement a cross-platform video chat app focused on keeping things simple. My responsibilities include:

- Designing and implementing responsive structures for the front end including navigation
- Supporting the media team in implementing front end for video chat functionality
- Assisting the back end team with deploying to Heroku using Docker
- Our tech stack includes React, Sass, WebRTC, Socket.io, Apollo/GraphQL and Peerjs on the front end, and Express, Peerjs, GraphQL and Socket.io on the back end

Full Stack Developer

light_box Photo Network

present

I built a photo-sharing and social networking app from the ground up that centers photography itself as the main focus of the user experience. My responsibilities include:

- Planning, organizing and building all aspects of the project
- Implementing front and back end frameworks for mobile platforms including navigation, photo galleries and photo uploads
- Our tech stack includes React Native and Cloudinary on the front end, and PostgreSQL on the back end with Sequelize as an ORM

Foreign Language Teacher

METEN International Education Group

2015 – 2018 | Chengdu, China

I led classes for business and school-aged learners, exploring topics ranging from food to academia and working with many students for the entirety of their METEN journeys.

- Worked in a team of professionals to provide high-level education to students and other professionals
- Participated in weekly meetings and provided daily input to inform school-wide curriculum
- Maintained collection of lesson plans for use by all teachers
- Planned and taught 4-6 classes per day

Projects

Slack4Adium

present

- Continue work on existing code base
- Attempt to make Slack service use-able on Adium chat platform
- Cocoa, Objective C, XCode

Skills

Front End

UX Design, React, Redux, Angular, SASS, HTML

Back End

Node, Express, GraphQL, Postgres, ORMs, Docker

Presentation

Public speaking, Powerpoint, Prezi

Mobile

React Native, Expo

Languages

- English
- Français
- Català
- Español

Education

Codeworks

Full Stack Development

- React/React Native/Angular
- JavaScript/TypeScript
- Express/Koa
- HTML/CSS

Portland State University

BA, English Literature

- Cultural Studies
- Caribbean Literature
- Rhetorical Analysis
- Gender Studies

Interests

Photography

Keen photographer and operated a small photography business specializing in weddings.

Cycling

A fan of old steel frames with lots of miles and love on them.

Words

In a parallel life, I consume books and author blurbs voraciously.
